General Product Overview

Bis-Tris is a zwitterionic biological “Goods” buffer, often used in biological pharmaceutical manufacturing and biochemistry for extraction, separation, and purification, as well as an intermediate in synthetic reactions for both proteins and nucleic acid. Bis-Tris can also be used as a process aid in peptide synthesis, or as a scavenger agent for metal ions such as Cu and Pb.

Industry Application

Suitable for use in biological and biotech chemical process applications from R&D through scale cGMP production.
